Summary

Dedicated software developer with expertise in Java and Node.js, specializing in backend development with Spring Boot and Express JS. Proficient in front-end technologies including Tailwind CSS, React.js, Next.js, and Vue. Extensive experience working with databases such as MongoDB, MySQL, and PostgreSQL. Currently pursuing a computer science degree remotely from the Goldsmith University of London.

Education

Master of Applied Computing: Offshoring.

University Med 5, Rabat, Morocco | 2020-2022

Bachelor of Computer Science (Currently Pursuing).

University of London, Remote | 2023-20

Coursera continued learning:

Certification of IBM Full Stack Developer.

Certification of google IT Support Specialist.

Certification of Applied Software Engineering.

Professional Experience

As a software Developer I:

- Developed robust backend solutions using Node.js and Java, ensuring scalability, security and performance.
- Collaborated with cross-functional teams to design and implement RESTful APIs, integrating seamlessly with front-end applications.
- Designed and maintained databases, including MongoDB, MySQL, and PostgreSQL, optimizing data retrieval processes.
- Utilized version control systems (Git) to manage and track code changes effectively.

Technical Skills

- **Programming Languages:** Java, JavaScript (Node.js), Python
- **Front-end Technologies:** React.js, Next.js, Vue.js
- **Database Management:** MongoDB, MySQL, PostgreSQL
- **Frameworks:** Spring Boot, Flask, Django
- **Version Control:** Git
- **Cloud Services:** Aws
- **Other:** RESTful APIs, GraphQL

Projects

Weather App | <https://github.com/badrmellal/weather-app>

- Simple project using querySelector and api.weather.com to fetch data.

Full Stack todos | <https://github.com/badrmellal/fullstack-todos>

- For this project i used java/Spring Boot in the backend and hosted in Aws.
